Northeast of Kramatorsk (37°33' E/48°43' N), Ukrainian SSR, east of the small Torets River.

## 2. plant installations

Soviets said that the plant was constructed from 1930 to 1932 and was 80 percent damaged during the war. Reconstructed according to the old plans the plant resumed full operation in May 1949. Production was constantly increasing. For plant layout see Annex 2.

### 3. Work force

More than 10,000 laborers, 30 percent women, working in three shifts.

#### 4. production

Machine parts and accessories, except electric motors.

comment:

a. This is the second report on the Stalin Machine Plant. The previous report \* which, for the lack of comparable records, has not been commented on, can now be rated with attached pre-war aerial photograph (Annex 1) and attached sketch (Annex 2).

comparison shows that previous data \* approach facts.

b. This report confirms previous information \* on the main plant buildings as to location and therefore is considered valuable. Previous sketch \* and attached photograph strongly agree on the layout of those buildings which can be identified on the photograph. It is thus concluded that the heavily damaged plant was actually reconstructed in its original shape.
